Title: Release Notes - Release 7.0.6  
Issue: 01  
Original Author: Cal Iaccarino  
Last Update: Cal Iaccarino  
Filename: Release Notes 7\_0\_6\_Final.doc  
Date: 18<sup>th</sup> January 2006

## Introduction.

These Release Notes cover issues addressed in release 7.0.6 of the 4RF SuperVisor software, cross-connect Java application, and firmware.

## Release Notes

The issues addressed in release 7.0.6 were an incremental addition to releases 7.0.3 and 7.0.5 to address internal requests from the 4RF system test and production groups. This release note should be read in conjunction with 7.0.3 and 7.0.5 release notes.

Fixed issues with Alarm Table:

- Changed status of Alternate Image Table Alarm from Major to Minor when the radio re-boots after a watchdog or corrupt file event.

Introduced New Firmware Images

- DFXO    Rev B Hardware            c-fpga-e8-1.4.0  
          Rev C Hardware            c-fpga-e8-2.4.0

The Reset timeouts were extended to stop incorrectly reported start-up related failures.

Fixed bug relating to the detection of Off hook condition at start-up.

- HSS     Rev B Hardware            c-fpga-ec-1-1-5

Fixed bug relating to the cable auto-detection mechanism. Under certain conditions the operating mode (DCE or DTE) was not detected correctly causing synchronization errors (only present with Rev B hardware).
